

RICE MESH FABRIC

Crafted from 100% polyester, Rice Mesh fabric is renowned for its lightweight knitted structure, offering superior stretchability and breathability. Ideal for golf shirts, jerseys, and everyday wear, this fabric boasts excellent moisture-wicking properties, ensuring you stay cool and dry even during intense activities. With an SPF of 38, it provides moderate protection against harmful UV rays, making it a practical choice for outdoor enthusiasts seeking comfort and functionality.

UV JERSEY FABRIC

Crafted from a blend of 90% polyester, derived from recycled bottles, and 10% Lycra, UV Jersey fabric sets itself apart with its super lightweight knitted composition, offering unparalleled stretchability and comfort. Designed for sun protection, this fabric features a remarkable SPF of 63, making it perfect for sun hoodies, jerseys, and other outdoor apparel. Its moisture-wicking capabilities keep you dry and comfortable, while the fabric's superior stretch ensures unrestricted movement, making it an excellent choice for those who prioritize both performance and sustainability.

POLY SPANDEX FABRIC

Constructed from 92% polyester and 8% spandex, Poly Spandex fabric strikes the perfect balance between comfort and performance. With a mid-weight jersey construction, it offers great stretchability, allowing for ease of movement during various activities. This fabric is ideal for jerseys, golf shirts, and other athletic wear where flexibility and comfort are essential. Offering an SPF of 38, it provides moderate sun protection while ensuring breathability and moisture-wicking properties, making it a versatile choice for active individuals seeking comfort and functionality in their apparel.
